

# SAFA INTEREST ONLY LOANS

## THE PRODUCT

Interest only loans are longer term loans, typically longer than one year, where South Australian public sector agencies can borrow a set amount of funds for a known period. Interest payments are made throughout the life of the loan, at a frequency nominated by the client with the principal amount repaid at maturity.

## SUITABILITY

Interest only loans are suited to clients who require funds for a known period of time, greater than one year, and are able to repay the principal at maturity.

## FIXED OR FLOATING

Interest only loans can be negotiated on a fixed rate or floating rate basis.

Fixed rate loans will have the interest rate fixed for the entire term of the loan, so the client will have certainty of cashflows for the life of the loan.

Floating rate loans will have their interest rate linked to a benchmark, typically the Australian Bank Bill Swap rate (BBSW), and the rate may change periodically as market interest rates vary. This means that the amount of interest due each period may also vary.

## INTEREST MARGINS

A margin will be added to the interest rate applicable to the loan. The margin will vary according to the maturity of the loan, but is typically between 0.06% and 0.20% pa.

## DRAWDOWNS

Advice of the drawdown of a new loan must be communicated to SAFA at least 3 business days before the funds are required.

## CALCULATION AND PAYMENT OF INTEREST

For fixed rate loans, interest is calculated on the principal outstanding at the quoted fixed rate for the term of the loan. Interest can be paid at a frequency to suit the client, typically annual, semi-annual, quarterly or monthly.

For floating rate loans, interest will be calculated on the principal outstanding at the rate applying to that interest period. Interest rates can be reset and paid at a frequency to suit the client.

## EARLY REPAYMENT

The early repayment of an interest only loan will be calculated at prevailing market rates, and may result in a break cost to the client. Any favourable market valuation will be paid to the client.
